00%	<05%	10%	40%	90%	90%	10%	10%

Forecast for Friday 30 Sep 2022

Weather: Initial clear skies will allow mist and fog to form in the valleys. Skies clouding over during the early hours and continuing to lower ahead of heavy rain arriving during the second half of the morning. The rain will continue persistently alongside strong and blustery winds, eventually clearing later in the afternoon with some clear spells developing for the evening. Scattered showers will return into the night.

Chance of cloud-free hill tops above 600m: 80% or greater at the very start and end of the day, dropping to 30% during the middle of the day.

Low cloud and visibility: Fog lifting during the morning may transition to patchy low cloud at 200-400m before fully clearing. Otherwise, cloud lowering throughout the morning to bases of 400-500m during the heaviest of the rain, shrouding many slopes. Visibility becoming very poor in the heavy rain and poor during any morning valley fog.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Adequate waterproofs will be a necessity during the middle part of the day. Navigation is also likely to be tricky in very poor visibility associated with persistent heavy rain.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
14:00 on Thu 29 Sep 2022	6.2mm	7mm	12mm

Forecast for Saturday 01 Oct 2022

Weather: Clear spells overnight will transition into sunny spells throughout Saturday. The chance of blustery showers continues for most of the day, some of which could be heavy, but they'll be well scattered with a number of dry intervals in between.

Maximum wind: 30mph westerly winds on the hills to begin, easing to 20mph by the evening. Gusting 40mph around any heavy showers.

Chance of cloud-free hill tops above 600m: 80%.

Low cloud and visibility: Most cloud bases remaining above the summits. Patchy cloud may drop to 600m and shroud higher summits at times, mainly on western slopes in the morning. Otherwise, visibility will mostly be very good outside of any showers.

Temperature: **Valleys:** Plus 9 Celsius, rising to plus 17 Celsius.
At 600m: Plus 6 Celsius, rising to plus 9 Celsius.
Freezing level: Above the summits.
